

To Whom It May Concern:

We at Emerald Drywall Finishing Corp have always strived to use the best products available in the drywall finishing market. We came across Never-Miss and find it to be very useful and advantageous in the use of Drywall Finishing. We have currently used Never-Miss @ PS 42 in Far Rockaway Queens to provide a Level 5 finish. We sprayed the walls with the Never-Miss and the results were amazing. There was no flashing and the coverage was great. The touch up was none and the finish was like glass. The team over at Never-Miss was very supportive and very much involved to ensure that their product was readily available and that we understood its purpose. Everyone that came on the site was really impressed, the architect, inspectors, supers, tradesmen, and most important our client. We are currently doing a high end Embassy Suites in the ground zero area of NYC and we are going to definitely utilize Never-Miss. With the help of Never-Miss we have brought Drywall Finishing to a new level. We appreciate their sincerity and their commitment to their product. It really is a pleasure to be a part of their growth.

Sincerely,

Brandon Clare
