August 5, 2011

There are new products that come out every day it seems in this industry. What we need are products that improve Quality and Production without the cost out weighing the benefit. Utilizing Never-Miss Gel in a Level V situation has been that one product that comes along very rarely that really works.

I have been in the industry for thirty-seven years and have been involved in the challenges of satisfying extremely demanding clients. We are now doing the punch list on a large new hospital project. We had the challenge of Level V on the paperless drywall. We are 50% through the building on punch list with a total of 6 finishing items. (Mostly damage and gaps around electrical devices). With over 1 million sf of drywall I think the results speak for themselves.

The team at Never-Miss have been very patient with our employees and have answered their questions every time in impressive time.

Thank you,

A handwritten signature in black ink, appearing to read "Robert A. Coyle", with a long horizontal line extending to the right.

Robert A. Coyle
